

Course code: S1505

Product Safety and Conformity Representative (PSCR)

A Product Safety Conformity Representative (PSCR) is a nominated staff who is responsible for ensuring that product integrity meets local and international legal statutes and also justifies the safety expectations of the public. This course is important for an organization in the automotive supply chain which is required to ensure the safety and conformity of its products. The organizations have to comply with the legal regulations in all relevant countries and satisfy the safety expectations of the general public – which is where Product Safety and Conformity Representatives come in. This training will give you the expertise you need to perform the daily work of a PSCR in a more professional and targeted manner which can be applied to your organization.

OBJECTIVE

- To describe the concept overview of the PSCR.
- To provide knowledge on how product integrity is organized.
- To be familiar with its place in the product life cycle.
- To apply concept to manage your task as PSCR professionally.
- To explain your responsibility in the entire supply chain in automotive.
